

## PRIMARY SCHOOL NETBALL YEAR 4/5 ROTATIONS

Teams rotate quarterly, Team 1 go clockwise, Team 2 goes anti-clockwise.  
Team 1 left hand side of draw, Team 2 right hand side of draw.

Check what "Team" your team was on last week, ie Team 1 or Team 2 then follow this rule:

Team 1 (last week) to Team 1 (this week) (or Team 2 to Team 2) Start player on their **last** positions from week before

Team 1 to Team 2 (or Team 2 to Team 1) Start player on their **first** positions from week before

Follow this sequence in regard to players having full games, ½ games, etc:

1. Start with the players who had a **full** game last week and are having a **full** game this week, put their names down.
2. Then do those that have a **full** game this week and had a ½ game last week. Pick any of the lines that don't have the positions they played last week.
3. Then put the players in who are having a half game this week.
4. Asterisk any players repeating positions. This indicates they have repeated and they will play positions next week that don't include the positions they have repeated.
